

Hello everyone

April at last; the best and busiest month of the year – for me anyway!

Last month, our first speaker of this new programme was Dr. Bob King, who fascinated us with his memories of his involvement with the Concorde project and in particular the design of the windscreen and its production!

This month we see another welcome return of David and Pam Humphries, who this time will be discussing “Water! Water!” the story of Brum’s water supply. By previous experiences this should be both informative and fun!

Refreshments will be provided by French.

At the last meeting, a majority indicated they would once again support the Xmas lunch at Maxstoke so we propose to go ahead with that booking. If you have any alternative views please speak now.

Don’t forget that subs are now due at £20 per person and can be paid in all the usual ways, including at the meeting next week. I believe there are still about 30 people who have not paid or let us know they do not wish to rejoin.

So I hope to see many of you next Monday 20th at the usual time!

Peter
